

AI-Powered Smart Testing & Change Intelligence

Deliver Flawless **salesforce** Updates
On Time,
Every Time.

Panaya is an all-in-one platform that seamlessly combines AI-powered test automation, test management, and Change Intelligence with native integration across platforms, all within a user-friendly interface. Panaya Smart Testing ensures that your Salesforce system remains stable as your business grows.

Smart Testing for Salesforce

Designed for all your testing needs

All-in-One Platform

Streamline testing workflows

Establish a unified quality hub for managing all Salesforce testing activities, including requirements, planning, execution, defect management, and real-time monitoring.

Codeless Ease of Use

Make testing accessible for all team members

Create robust automated scripts effortlessly, within just one hour of onboarding, reducing reliance on technical experts.

Fast Lane to Automation

Expedite transition to automated testing

Leverage your existing manual test repository, accelerating the pace of automation adoption.

Cross Application Testing

Enhance system integration and mitigate risks

Conduct cross-app testing, identifying potential points of failure and inconsistencies across your interconnected digital landscapes.

AI-Powered Test Generation

Streamline test creation with risk-based insights ("what to autoamte")

Leverage Panaya's Impact Analysis engine, combined with GenAI, to build a comprehensive test automation catalog that reduces risk and enhances test coverage.

“

Panaya ensures our sales teams can focus on hitting revenue targets instead of fighting system deficiencies.

Test Smarter, Deliver Faster

Panaya's Salesforce testing solution empowers companies to automate effortlessly and deliver rapidly. With real-time monitoring and collaborative testing, organizations ensure efficiency and compliance.

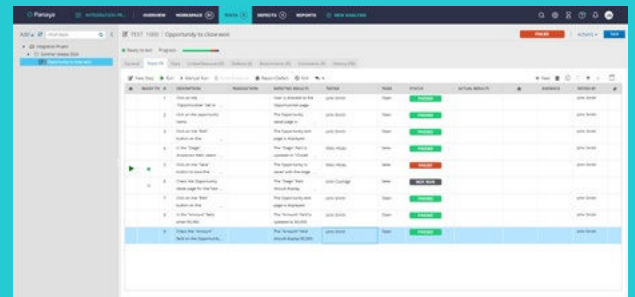

Codeless Test Automation

- Automate testing of business processes with a user-friendly approach for non-technical users.
- Create and manage your automation schedules with a click of a button.
- Validate the seamless functionality of business processes across business applications, like Salesforce, ERP, e-Commerce, etc.

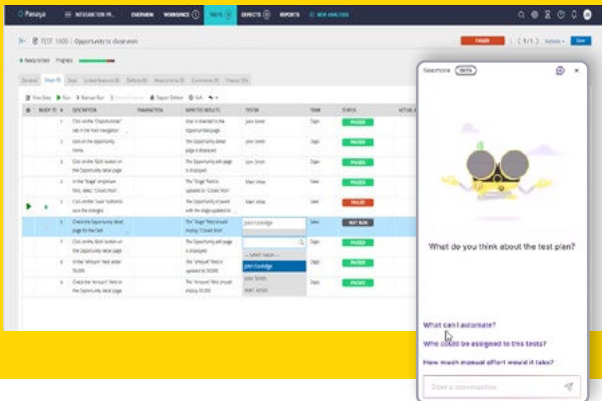

End-to-End Test Management

- Test your business processes end to end from planning to execution to defect management.
- Manage collaborative and sequenced testing processes with automatic notifications and instant insights.

AI-Powered Testing

- Achieve faster cycles, more efficient testing, and better org health with Panaya's Co-Pilot smart assistant.
- Detect and correct test script issues with self-healing capabilities, eliminating rework caused by unstable testing tools.

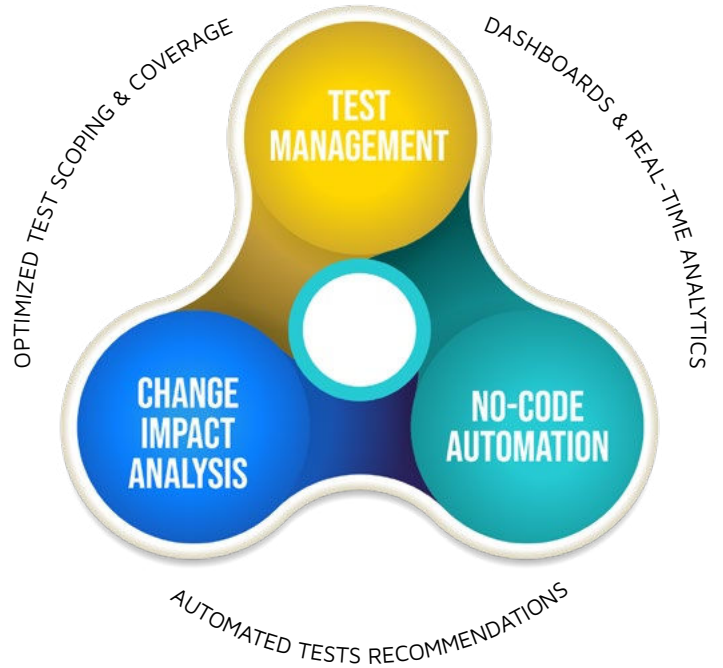

Metadata Analysis

- Integrate Shift Left practices into development by running impact analysis in the design stage to shorten test cycles and reduce production bugs.
- Optimize test coverage and reduce test cycles by pinpointing components impacted by your changes and adjusting your tests accordingly.
